

**Mitch finally  
realized what to do with  
all that **motor oil**.**

**Now we know better!**

Pouring used motor oil down a storm drain  
or in the street is just plain yucky!  
It dirties our rivers, streams and water supply.  
Even a leak spreads oil on the roadway  
and washes it into the storm drain when it rains.

***Recycle your used oil  
and fix those nasty leaks.***
